

Benchmarks of Effective Practice

Active and Collaborative Learning

Students learn more when they are actively involved in their education and have opportunities to think about and apply what they are learning in different settings. Through collaborating with others to solve problems or master challenging content, students develop valuable skills that prepare them to deal with the kinds of situations and problems they will encounter in the workplace, the community, and their personal lives.

CCSSE Items	
4a	Frequency: Asked questions in class or contributed to class discussions
4b	Frequency: Made a class presentation
4f	Frequency: Worked with other students on projects during class
4g	Frequency: Worked with classmates outside of class to prepare class assignments

9a	Amount of emphasis by college: Encouraging you to spend significant amounts of time studying

Student-Faculty Interaction

In general, the more interaction students have with their teachers, the more likely they are to learn effectively and persist toward achievement of their educational goals. Personal interaction with faculty members strengthens students' connections to the college and helps them focus on their academic progress. Working with an instructor on a project or serving with faculty members on a college committee lets students see first-hand how experts identify and solve practical problems. Through such interactions, faculty members become role models, mentors, and guides for continuous, lifelong learning.
